

BIOBASE

**Autoclave 18 Litros
Vertical Analógico
Modelo: BKM-P18II**

Applications:

It is widely used in the sterilizing of surgical, dental instruments, glassware and test-tube dressings, foods and spices, etc.

Features:

- ◆ Self-expanding seal ring in the door-joint and good tightness and term smallness-prevent steam leakage.
- ◆ Stainless steel inner tank with mirror-polished surface treatment.
- ◆ Timed/constant selection, high efficiency and energy saving, durable and reliable in quality.
- ◆ Equipped with a low water level safety device, the heating will cut off automatically when lack of water (only type).
- ◆ Buzzer reminding of the sterilization cycle finishing but also stop it.
- ◆ With safe pressure relief device, when pressure over the limit, it will automatically pop off, and buy half-automatic stop heating and alarm function after sterilization (timing control type).
- ◆ The safety valve have dual functions (safety and exhaust steam).

Model		BKM-P18II				
Type		Anti-dry Type				
Capacity	18L					
Max Working Pressure	0.165MPa					
Max Working Temp.	129°C					
Rated Working Pressure	0.14MPa					
Rated Working Temp.	126°C					
Temp. Setting	Fixed 126°C					
Heating Method		Electricity				
Sterilizing Time	Manual timing					
Chamber Size		Φ280*350mm				
Altitude	<2600m					
Disinfection Tank		Φ265*265mm				
Automatic Control	No					
Low Water Level Power Off Mode		Water level switch				
Consumption	2KW, 1.5KW can be customized					
Power Supply	AC220V, 50/60Hz(Standard); AC110V, 50/60Hz(Optional)					
External Size(W*D*H)		450*340*600mm				
Net Weight		13.5kg				
Package Size(W*D*H)		400*400*670mm				
Gross Weight		14.5kg
